

MESSAGE

ONGC has always adopted best industry practices in Corporate Governance. To ensure trust-worthy relations between the organization and all its stakeholders, ONGC has gone the extra mile to implement various voluntary initiatives to establish ethics and transparency in its business practices at the strongest footing.

Digital India project envisioned by Hon'ble Prime Minister of India aims to transform India into a connected knowledge economy which would offer world class services at the click of a mouse. Drawing inspirations from this grand vision, ONGC decides proactively to launch a comprehensive IT - platform that would address the grievances of various stakeholders like employee, shareholders, vendors, former employees as well as citizen of the country.

The initiative will also strive towards ensuring a paperless office which would save trees and reduce carbon emission substantially.

I wish this initiative all success.

(Dinesh K Sarraf)
